◆ Product Profile Super Premium Quality

- Manufactured only from the finest and select materials from leading Japanese steel maker
- All phases of production are done under the most strict quality control standards within our own factory in Japan (100% made in Japan)
- Heat treated in our own facility to achieve the ultimate uniformity of hardness
- Extremely sharp and mirror finished edge gives the cleanest finish and stays sharp longer (approx. 30% to 40% longer vs conventional 18%W by field test)
- HP series to achieve even longer tool life (approx. 100% to 200% longer) also available

※ Products with different specification and materials can be manufactured upon request.

Appearance and specification may be altered without prior notice in order to improve the products.
